### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Inventorship*

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Kotchi et al (US 6,491,020).

Re claims 1-3 and 11-13 Kotchi et al note Figure 3 shows a throttle valve device including upper throttle member 22 (air intake portion), lower throttle member 26 (air discharge portion) [see Figures 2-3 for more details].

Re claims 4-6 and 14-16, Kotchi et al note col. 3, line 33 through col. 4, line 3, which describes the material of the throttle body (housing part) is used in the invention.

Re claims 7-10 and 17-20, see whole document for details.

4. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Hernandez et al (US 5,988,131). This reference discloses a throttle valve device which is including 2 parts of

throttle body and the throttle body housing are both formed primarily from a plastic or composite material (see whole document for details).

5. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Forbes et al (US 5,979,871). This reference discloses a throttle valve device includes a multipeace clamshell throttle body and the clamshell design permits greater use of lighter plastics in place of metallic components and minimizes the number of parts through incorporation of plastic injection molding techniques (see whole document for details).

### **Conclusion**
